

**PRECISION EXTRUSION, INC.**

ISO 9001:2008  
ISO 13485:2003

## **PRECISION EXTRUSION INC. REGISTERED ISO 13485**

Precision Extrusion, Inc. (PEI) is very proud to announce the Company's successful registration to the ISO 13485:2003, Quality Management Standard for Medical Devices. After completion of the four-day audit that concluded with zero observations, the auditor praised the company for its efforts. Also, the auditor stated that this was the first time he ever recommended certification for a company, like Precision Extrusion, on a first audit.

Company President Mike Badera, thanked the entire PEI Team for focusing on the increased quality requirements coming from our partners in the medical device industry. Rosy Wang, the company's VP and COO, who spear-headed the effort said, "By achieving this recognition Precision Extrusion Inc., has raised our internal quality system to the highest ISO standard for component manufacturers, which will allow us to continue to provide the best possible products and support to our customers in the very demanding medical device industry."

Precision Extrusion Inc. is a New York based contract manufacturer of medical device components and sub-assemblies based on thermoplastic tubing produced by the extrusion process. For over 20 years, the company has provided OEM contract manufacturing services to a world-wide variety of medical device producers engaged in manufacturing endovascular, cardiology, radiology, neurology, orthopedic, and dental medical devices. Additionally, Precision Extrusion manufactures some very specialized products for application in the Fiber Optic Industry, and for Precision Measurement Systems.

In 1998, the company was first certified to ISO 9001 and since then has successfully maintained that certification year after year. Getting the dual ISO 13485 along with the ISO 9001 certification proves PEI's commitment to quality, dependability, and technology and will position PEI for further expansion in the medical device marketplace.
